Explanation of Features

- Web Protection** Protects against websurfing-related threats in real-time including viruses, trojans, worms, and other malicious content. Protection is also extended to files downloaded or viewed from the internet.
- Proxy Server** Irongate stores repeatedly requested internet objects (i.e. web pages) reducing access times, bandwidth consumption, and useful in increasing internet speed and performance.
- Email Protection** Irongate scans incoming emails and only clean, virus-free emails are handed to your Exchange server for distribution. Integrates seamlessly with Outlook and your Exchange Server. A must-have for companies utilizing an Exchange Server.
- SPAM Filter** Irongate provides each employee in your company with customized Spam protection. SPAM training is made easy with drag-and-drop training in Outlook. Spam messages are processed and quarantined inside Irongate and safely stored outside your Exchange Server. A must-have for companies utilizing an Exchange Server.
- Virus Definitions** Irongate automatically updates itself daily with the latest virus definitions so that you have the most complete protection against all known threats. It is imperative that you do not allow these updates to lapse.
- Technial Support-
Email Only** Unlimited Technical Support is provided via e-mail correspondence only. This is an affordable option to small businesses who don't want the added expense of telephone support. However, telephone support is always available and is billed at an hourly rate.
- Technial Support-
Telephone** For customers who demand prioritized support, this option allows unlimited 1-on-1 telephone support with our experts free of charge.
- Warranty** Replacement of your Irongate server due to manufacturer defects.
